## **L. Relationship of the two species**

- 1. Predation.** *Proctotrupes* are known to eat the eggs and larvae of other insects, including those of beetles, moths, and butterflies. They have been observed feeding on the eggs of the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*. They also eat the larvae of the housefly and the American cockroach.
- 2. Competition.** *Proctotrupes* compete with other insects for food, especially when food is scarce. They have been observed competing with the housefly, *Musca domestica*, for food.
- 3. Mutualism.** *Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*. They benefit from the presence of these insects by receiving protection from predators and by receiving food from them.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

*Proctotrupes* are mutualistic with other insects, such as the American cockroach, *Periplaneta americana*, and the housefly, *Musca domestica*.

## Proposed Changes

### Proposed Changes

#### 1. Introduction

This paper summarizes the results of the proposed changes to the current system.

#### 2. Summary of Proposed Changes

The proposed changes will affect the following areas:

#### 3. Detailed Description of Proposed Changes

The proposed changes will affect the following areas:

The proposed changes will affect the following areas:

#### 4. Impact of Proposed Changes

The proposed changes will affect the following areas:

The proposed changes will affect the following areas:

#### 5. Conclusion

The proposed changes will affect the following areas:

### Proposed Changes

The proposed changes will affect the following areas:

1997-1998 Annual Report to the Director of the Bureau of Land Management  
as required by the Federal Lands Policy and Management Act.
